

REPORTING TO THE COMMUNITIES

The people of SERDC recognizes the public's right to know the achievement, or lack of achievement, of stated goals and objectives. The Board's commitment to accountability requires effective reporting to the communities.

The Board is committed to open and candid progress reporting. Reports will be available to all students, staff, parents and partners that the board feels can be shared without compromising the effectiveness of its operations.

It is expected that each Board member, provide information on or about relevant topics to their communities on behalf of the board. That each member acts as an ambassador of SEC.
