

Media Relations

The Board believes that an efficient and mutually-respectful working relationship with the media (generally print and broadcasting) is beneficial both to Southeast and to the media. Such a relationship will enable the media to report on SEC's activities and will enable the Board to provide accurate information to the public.

To address potential issues related to liability, the Southeast Board has named the Chairperson of the Board and the Director/Principal as the official contacts for the media, without such permission, staff are not allowed to speak to media.
