

Emergency School Closures

The Board believes that instructional time must be maximized in order to provide the most benefit for students. The school will therefore be in compliance with the school days requirements prescribed by Manitoba Education. However, the Board does recognize that there may be emergency situations where a school must be closed to ensure the safety and health of students and staff.

In such circumstances, the Director/Principal and Board Chairperson, is authorized to close a school providing the appropriate procedures are followed.
