

## After School Academic Class

Homework is defined as an important and relevant learning activity that is related to the school program, and that takes place in a variety of settings in the lodge or in the school. The purpose of homework is to support the learning process and enhance the educational growth of the student.

The Board believes that homework is a partnership between teachers and students. Homework gives each student the opportunity to develop important skills, acquire new knowledge and consolidate and reinforce learning in practical and meaningful ways.

The school has instituted an academic class for all those students whose marks are below 60%.

On Fridays, a student list is posted, for students who are under the 60% requirement. ( no actual mark is posted) Students are required to report to the class for which they have the mark under 60%,

If a student is on this list, a student will lose their sign out privileges until such time that the mark is above 60%.
