

Sickness, Illness and Accidents

The Board believes that while a student is in the care of Southeast and its employees, collectively there is a duty to ensure that each student receives appropriate care for any sickness, illness or accident that may occur.

In association with our application process, a parent must give permission for Southeast to provide care when required in accordance with the procedure as outlined.

It is also a requirement that all appropriate documentation be completed for each student's care that has been administered.

When staff feel that a student's sickness or illness is of a severe nature a student's parents/guardians will be contacted. In the case of an accident, parents will be contacted as soon as possible, regardless of the nature of the accident.
